Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	• Register/login • Enter player details • Create player profile	• Enter match/training statistics • Record batting, bowling & fielding performance • Update performance after each match	• View performance dashboard • Compare previous performances • Identify strengths and weaknesses
Touchpoint <i>What part of the service do they interact with?</i>	• * CRICKSTATS website/app • Registration page • Player profile	• * Performance entry form • Match statistics page • Dashboard	• Analytics dashboard • Performance charts • Reports/recommendations
Customer Thought <i>What is the customer thinking?</i>	• “I want to create my profile.” • “Is my information saved safely?” • “I hope this is easy to use.”	• * “I need to record my statistics.” • “How did I perform today?” • “I want accurate statistics.”	• * “Am I improving?” • “What are my weak areas?” • “How can I improve my performance?”

Customer Feeling <i>What is the customer feeling?</i>	• Curious • Interested • Hopeful	• Focused • Engaged • Motivated	• Confident • Motivated • Goal-oriented
Process Ownership <i>Who is in the lead on this?</i>	• Registration module • Database/Admin	• Performance tracking module • Database	• Analytics module • Coach/Admin • Recommendation system
Opportunities <i>How can we improve this stage?</i>	• Simple registration process • Secure login • Easy profile creation	• Quick data entry • Automatic calculation of statistics • Reduce manual errors	• Graphical performance reports • Player comparison • Personalized improvement suggestions

Simple explanation for presentation

Stage 1 – Registration & Setup:

The player registers in CRICKSTATS and creates a profile by entering details such as name, age, role and playing information.

Stage 2 – Performance Tracking:

After every match or training session, the player or coach enters runs, balls faced, wickets, overs, catches, strike rate, economy rate, etc. The application stores and calculates the statistics.

Stage 3 – Performance Analysis & Improvement:

CRICKSTATS converts the collected data into charts, reports and performance analysis. The player can identify strengths and weaknesses and understand how performance changes over time.
