Project Name	Cricket Player Performance Tracking Application : CRICKSTATS
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

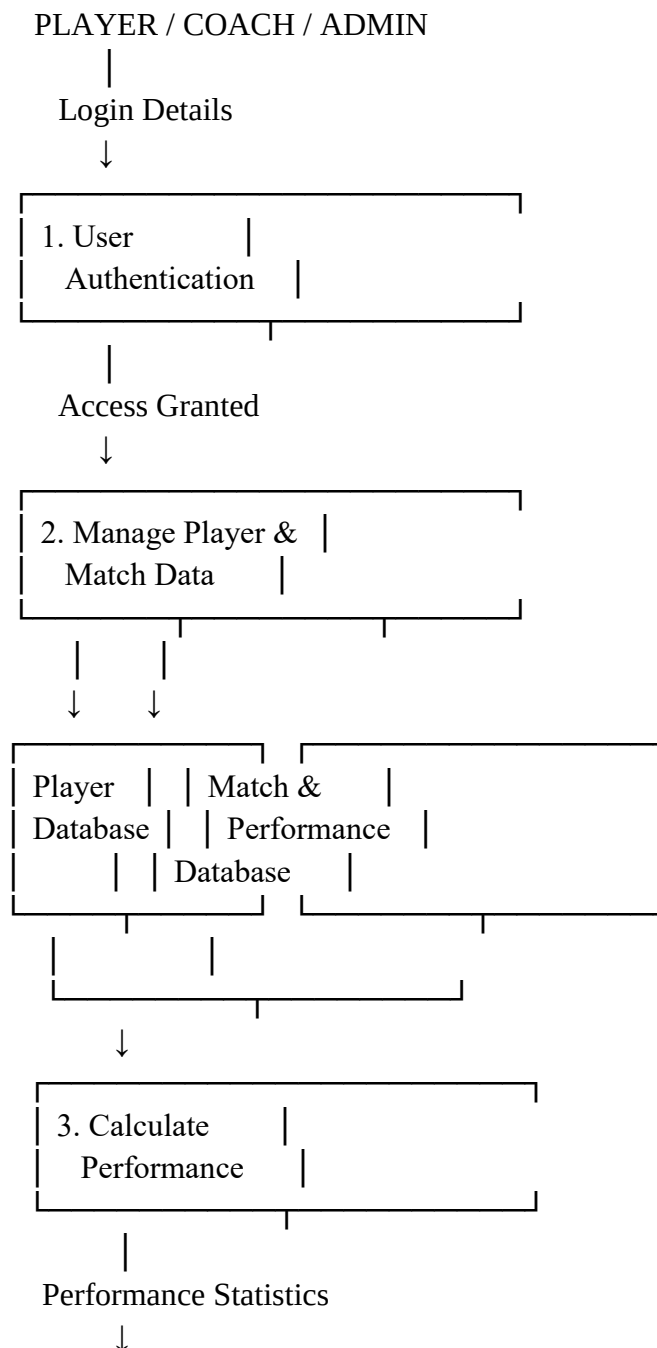

DFD Symbol Legend

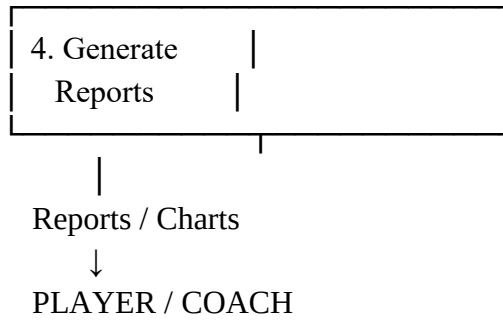

Symbol	Name	Description
Oval / Rounded shape	External Entity	Player / Coach / Admin – provides or receives cricket performance information.
Rectangle with numbered header	Process 1	User Authentication – validates login credentials and provides authorized access.
	Process 2	Manage Player & Match Data – adds and updates player profiles, match details and performance records.
	Process 3	Calculate Performance – calculates runs, wickets, averages, strike rate, economy rate and other statistics.
	Process 4	Generate Reports – generates player performance reports, statistics and charts.
Rectangle (solid fill, no number)	Data Store1	Player Database – stores player profiles and details.
	Data Store2	Match & Performance Database – stores match-wise batting, bowling and fielding records.

Labeled arrow	Data Flow	Transfers login details, player data, match data, performance statistics and reports between entities, processes and databases.
---------------	-----------	---

Example

The diagram below illustrates how the symbols above come together to form a complete **Data Flow Diagram (DFD)** for the **CRICKSTATS – Cricket Player Performance Tracking Application**. It shows how player and match data flow between users, processes, and databases to generate performance statistics and reports.

Main Data Flows to label on arrows

- **Player → Authentication:** Login Details
-
- **Authentication → Player:** Login Status
-
- **Player/Coach → Manage Data:** Player & Match Details
-
- **Manage Data → Player Database:** Player Information
-
- **Manage Data → Performance Database:** Match Performance
-
- **Database → Calculate Performance:** Stored Statistics
-
- **Calculate Performance → Generate Reports:** Calculated Statistics
-
- **Generate Reports → Player/Coach:** Performance Report & Charts
