

Solution Architecture

Date	30 September 2026
Team ID	6ab2a945009dcca3125ab472
Project Name	Cricket Player Performance Tracking Application : CRICKSTATS
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Presentation / Client Layer

[e.g., Web App (React), Mobile App (Flutter), Admin Dashboard]

API Gateway / Load Balancer

[e.g., Nginx, AWS API Gateway, Express Server]

Auth Service *[e.g., JWT, OAuth2]*

Core Logic Service

[e.g., Data Processing, Machine Learning Models]

External API Integrations

[e.g., Payment Gateway, Email Service]

Data / Storage Layer

[e.g., PostgreSQL Database, MongoDB, AWS S3]

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
<i>Presentation Layer (UI Layer)</i>	<i>User interface where Coaches and Admin interact. Displays Player list, Match entry forms, Reports and Dashboards. Handles all clicks and data entry screens.</i>	<i>Salesforce Lightning Experience, Lightning App Builder, Lightning Web Components (LWC), Salesforce Mobile App</i>
<i>Business Logic Layer (Application Layer)</i>	<i>Contains all business rules and automation. Calculates Strike Rate automatically, validates data (no negative runs), controls coach permissions, triggers flows.</i>	<i>Apex Classes, Salesforce Flows, Formula Fields, Validation Rules, Permission Sets, Process Builder</i>
<i>Data Access Layer (API & Integration Layer)</i>	<i>Acts as a gateway between UI and Database. Fetches player data, saves match records, handles queries securely without exposing database directly.</i>	<i>Salesforce Standard API, SOQL, SOSL, Apex Controllers, Object Manager</i>
<i>Database Layer</i>	<i>Stores all cricket data permanently and securely in cloud. Maintains relationships between Players and their Match performances</i>	<i>Salesforce Cloud Database, Custom Objects (Playerc, Match_Performanc ec), Fields, Lookup Relationship, Records</i>
