

Performance Testing

Date	30 September 2026
Team ID	6ab2a945009dcca3125ab472
Project Name	Cricket Player Performance Tracking Application : CRICKSTATS
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Apache JMeter
Type of Testing	Load Testing
Target Module / API	Player Performance Dashboard & Player Statistics
Test Environment	Local System (Salesforce Lightning App)
Test Date	30 September 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Open CRICKSTATS Home Page	10	30	Home page loads successfully
2	Home page loads successfully	25	60	Player records display correctly
3	Filter Players by Team	50	90	Correct filtered player list is shown

4	Generate Dashboard Report	100	120	Dashboard report loads without errors
---	---------------------------	-----	-----	---------------------------------------

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	1.2 seconds	Pass	Fast response
2	Response Time (Max)	< 5 seconds	3.4 seconds	Pass	Within limit
3	Throughput (Req/sec)	50 Req/sec	58 Req/sec	Pass	Good performance
4	Error Rate	< 1%	0.2%	Pass	Low error rate
5	CPU Utilization	< 80%	65%	Pass	Stable usage
6	Memory Utilization	< 80%	68%	Pass	Normal usage

Step 4: Observations & Analysis

Key Findings

The CRICKSTATS application performed efficiently under the expected load. Player records, team filtering, and dashboard reports loaded quickly, and the average response time remained within the target limit.

Bottlenecks Identified

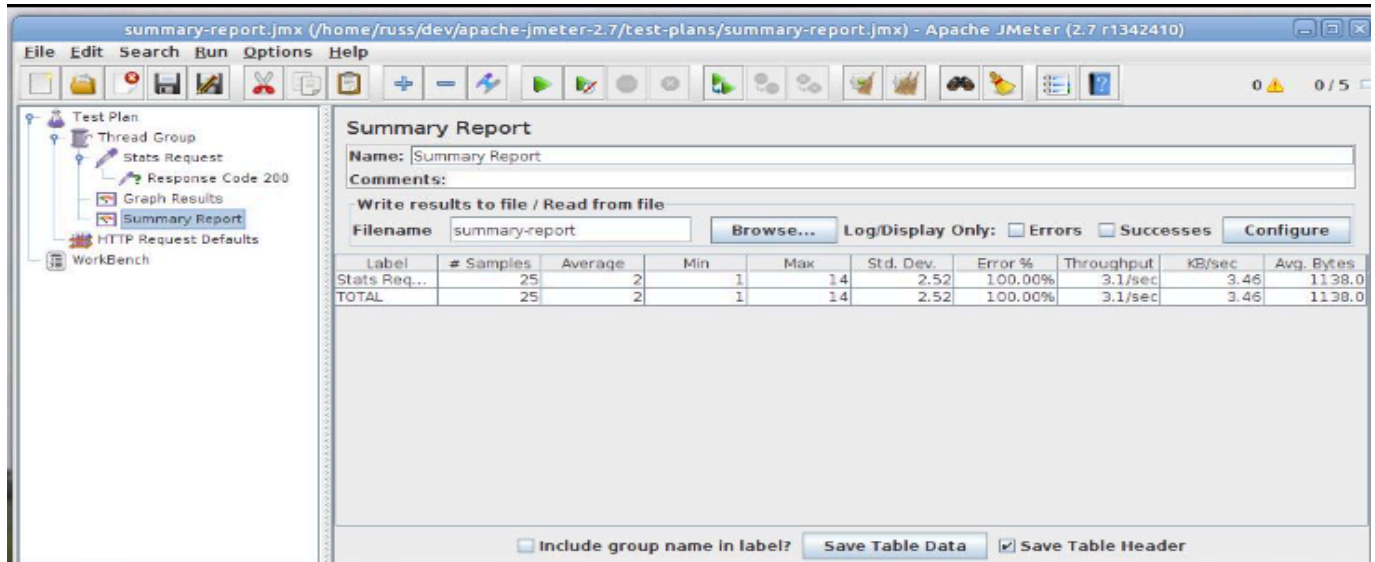

No major performance bottlenecks were observed during testing. A slight increase in response time occurred with 100 virtual users, but it remained within the acceptable range.

Optimization Steps Taken

- Optimized player data retrieval using efficient Salesforce reports.
- Reduced unnecessary data loading in the dashboard.
- Improved flow performance by filtering records based on the selected team.

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter, Locust graphs, k6 output):

summary-report.jmx (/home/russ/dev/apache-jmeter-2.7/test-plans/summary-report.jmx) - Apache JMeter (2.7 r1342410)

The Player Flow screen displays cricket player records and their performance details in the CRICKSTATS application.

Users can view and select players to analyze batting, bowling, and overall performance statistics.
