

Project Executable Files

Date	30 September 2026
Team ID	6ab2a945009dcca3125ab472
Project Name	Cricket Player Performance Tracking Application : CRICKSTATS
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	NA - Salesforce no-code platform
4	Database schema / seed files (if applicable)	Yes - Player_c, Match_Performances objects
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if	NA

	applicable)	
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```

/project-root - CRICKSTATS_project-2
  /src - Source code files - /force-app/main/default/ (objects, tabs, flows, app)
  /tests - Test files - Sample Player and Match Performance records
  /docs - Documentation - Project Documentation Word file (.docx)
  /config - Configuration files - /config/project-scratch-def.json
  README.md - Setup and run instructions
  sfdx-project.json - Project config file (instead of requirements.txt for Salesforce)

```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://orgfarm-f56a82e141-dev-ed.develop.lightning.force.com/lightning/page/home
Login Credentials (Demo)	Username: your-dev-org-username Password: Provided in README / Will share if needed

Platform / Hosting Provider	Salesforce Platform (Salesforce Cloud)
Repository Link	https://github.com/autanm22322324214029/CRICKSTATS_ATS_project-2-
Demo Video Link	 Screen Recording 2026-09-25 224748.mp4

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites: Salesforce Developer Org account (login.salesforce.com) Salesforce CLI (sfdx) - latest version installed VS Code with Salesforce Extension Pack Git installed.

Step 1: Clone the repository:

git clone

https://github.com/autanm22322324214029/CRICKSTATS_project-2-

Step 2: Open project in VS Code:

Step 3: Authenticate with Salesforce Org:

```
$ sf org login web --alias CRICKSTATS-Org
```

Opening login.salesforce.com/login in default browser...

Successfully authorized your org with org ID: 00D5j00000XXXXX

Step 4: Deploy to your org:

```
user@MBP CRICKSTATS_project-2 % sf project deploy start --source-dir  
force-app
```

Deploying Metadata...

- ✓ Preparing deployment (1/3) .. done (0.8s)
- ✓ Deploying to org: your-org@salesforce.com
- ✓ Deploying 15 metadata components...
- ✓ Deployed 15 components, 0 failed

Deployed Components:

- ✓ Object Player__c — success
- ✓ Object Match_Performance__c — success
- ✓ Tab CRICKSTATS — success
- ✓ CustomApplication CRICKSTATS — success

Objects: 2, Tabs: 1, Applications: 1 deployed successfully

Deployment completed successfully in 4.32s

Step 5: Assign Permission & Open App:

Setup -> App Manager -> CRICKSTATS App -> Assign to user profile, then App Launcher la CRICKSTATS open.

Step 6: Test the application:

The screenshot shows the CRICKSTATS App Manager interface. At the top, there is a blue cloud logo and a search bar. Below the logo is the CRICKSTATS logo and a navigation menu with items: Match Performances, Players, Reports, Dashboards, and Home. The main content area is titled "Player Flow" and contains a "Team_Picklist" dropdown menu with "Chennai Super Kings (CSK)" selected. A blue "Next" button is located at the bottom right of the form.

The screenshot shows the CRICKSTATS App Manager interface, specifically the "Player Flow" section. The "Team_Picklist" dropdown menu is still set to "Chennai Super Kings (CSK)". Below the dropdown, there is a table with 10 columns: a checkbox, "P.", "P.", "P.", "T.", "T.", "A.", "B.", "B.", and "B.". The table contains one row of data for MS Dhoni. The table is titled "1 of 1 item • 0 items selected". At the bottom of the form, there are two buttons: "Previous" and "Finish".

	P.	P.	P.	T.	T.	A.	B.	B.	B.
☐	MS	Dhon	7	68	\$312.00	62.4	Right - Hand ed	Right -Arm Fast	

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	When a Player record is deleted, related Match Performance records become orphaned because we used Lookup instead of Master-Detail relationship.	Implemented a validation rule / trigger to prevent deletion if child records exist. User must delete child records manually first. Status: Workaround Implemented.
2	Strike Rate formula $(\text{Runs} / \text{Balls Faced}) * 100$ throws a Divide by Zero error when Balls Faced is 0.	Updated formula to $\text{IF}(\text{Balls_Faced} * c = 0, 0, (\text{Runs} * c / \text{Balls_Faced_}c) * 100)$. Status: Fixed
3	Reports and Dashboards are slow when calculating real-time batting averages with large data volumes.	Created a Custom Report Type with filters. In future, we can use Batch Apex to calculate and store the values. Status: In Progress
