

Scalability & Future Plan

Date	30 September 2026
Team ID	6ab2a945009dcca3125ab472
Project Name	Cricket Player Performance Tracking Application : CRICKSTATS
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Manual data entry for player runs and match performance, no API integration	Time-consuming and chances of human error in score entry	High
2	System currently handles only small data (single team), not designed for bulk data like IPL / Tournament level	Cannot support large number of players and matches, reporting becomes slow	Medium
3	No advanced analytics - missing bowling economy, player comparison, and mobile app features	Limits user experience, coach cannot get full performance insights	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports only 5-10 users (our team + faculty) with basic permission set	Implement Role Hierarchy, create custom profiles for Coach, Player, Admin. Use Salesforce sharing rules to support 100+ users
2	Data Storage	Uses standard custom objects with limited data (50-100 records)	Use Big Objects for historical match data, enable Archiving, and implement Bulk API for importing large datasets
3	Performance	Reports and dashboards	Create custom indexes on Player__c fields, optimize SOQL

		load slowly when data increases, no indexing	queries, use Lightning performance best practices and caching
4	Security	Basic Permission Set for Coach only	Add Field Level Security, Validation Rules, Two-Factor Authentication and implement custom permission sets for different roles

Future Roadmap:

P h a s e	Planned Feature / Enhancements	Target Timeline	Expected Impact
p h a s e 1	Basic CRICKSTATS App - Player Object, Match Performance, Reports & Dashboard, Strike Rate formula	Completed (Sep 2026)	Core system working - can track player performance

P h a s e 2	Bowling Stats & API Integration - Add Bowling Figures (Economy, Wickets), Player vs Player Comparison, CricAPI integration for auto score fetch	Next 2 Months (Nov 2026)	Reduce manual entry, provide full all-rounder analysis
P h a s e 3	AI & Mobile Enhancement - Einstein Analytics for performance prediction, Mobile responsive Lightning App, Notifications for top performance	Next 4 Months (Jan 2027)	Coach can predict player form, access from anywhere
P h a s e 4	Tournament Management - Multi-team tournament module, Leaderboard, Auction feature, Integration with Payment gateway for paid tournaments	Next 6 Months (Mar 2027)	Scale app for IPL/College level tournaments, monetization
